

CV Jathurshan Gnanaseelan Benedict

JATHURSHAN GNANASEELAN BENEDICT

Data Engineer

Paris, France • g.jathurshan@gmail.com • LinkedIn • GitHub

PROFILE

Data Engineer with 3+ years of experience building scalable ETL/ELT pipelines across consulting, startup, and public sector environments. Experienced with Databricks, PySpark, Airflow, AWS, data quality frameworks, and Lakehouse architectures.

TECHNICAL SKILLS

Languages: Python, SQL

Data Engineering: ETL/ELT, Data Pipelines, Data Modeling, Data Quality

Processing: Pandas, PySpark, Apache Airflow

Cloud & Storage: AWS S3, MongoDB, MySQL

Architecture: RDL, BDL, DWH, DTM, STG, Lakehouse

BI: Power BI, Tableau, DigDash, Streamlit

Ingestion: REST APIs, SFTP, Web Scraping, Scrapy, Selenium

Other: Linux, Cron, SMTP, Git

PROFESSIONAL EXPERIENCE

DATA ENGINEER — ACT ON GROUP

Paris • 2024 – Present

Total Energies

- Maintained and optimized PySpark pipelines on Databricks using AWS S3 data sources
- Processed HR datasets for Power BI reporting and improved pipeline reliability
- Implemented automated data quality validation and anomaly controls

Ministry of Finance (CISIRH)

- Designed HR data marts and payroll reporting pipelines
- Built Airflow DAGs orchestrating large-scale payroll workflows
- Processed datasets within RDL → BDL → DTM architectures
- Implemented monitoring, logging, alerting, and data quality controls

DATA ENGINEER — DR. BRANDT

Paris • 2021 – 2024

E-commerce BI Platform

- Built ETL pipelines integrating Shopify, Google Analytics, Google Ads, SemRush, and Klaviyo
- Centralized multi-source business data into MongoDB and delivered Tableau dashboards
- Identified SEO and UX performance issues contributing to website redesign initiatives

Grey Market Detection System

- Developed distributed scraping infrastructure using Scrapy, Selenium, EC2, and rotating proxies
- Built product matching pipelines using embeddings and classification models
- Identified unauthorized resellers and distribution leakage patterns

PERSONAL PROJECTS

Financial Data Pipeline

- Built end-to-end ingestion pipeline using SEC APIs and AWS S3
- Designed layered architecture from raw to analytics-ready datasets

E-commerce Review Analysis

- Scraped and processed Sephora reviews using NLP techniques
- Built Streamlit recommendation interface

EDUCATION

Master's Degree — Statistics for Evaluation and Forecasting

Université de Reims Champagne-Ardenne

Bachelor's Degree — Economics & Management

Université Paris 13

CERTIFICATIONS & LANGUAGES

Certification: SAS Base Certification

Languages: French (Professional), English (Professional), Tamil (Native)
