PROFILE

Data Engineer with 3+ years of experience building and maintaining scalable data platforms across consulting, startup, and public sector environments.

Experienced in designing end-to-end ETL/ELT pipelines, distributed data processing, orchestration, cloud storage, and data quality frameworks using Python, PySpark, Airflow, Databricks, and AWS.

Strong exposure to modern Lakehouse architectures, HR/payroll data systems, web scraping infrastructures, NLP applications, and BI reporting pipelines.

TECHNICAL SKILLS

LANGUAGES

- Python
- SQL

DATA ENGINEERING

- ETL / ELT
- Data Pipelines
- Data Modeling
- Data Quality
- Batch Processing

PROCESSING & FRAMEWORKS

- Pandas
- PySpark
- Apache Airflow

CLOUD & STORAGE

- AWS S3
- MongoDB
- MySQL

ARCHITECTURE

- RDL
- BDL
- DWH
- DTM
- STG
- Lakehouse Architecture

BI & ANALYTICS

- Power BI
- Tableau
- DigDash
- Streamlit

DATA INGESTION

- REST APIs
- SFTP
- Web Scraping
- Scrapy
- Selenium

OTHER

- Linux
- Cron
- SMTP
- Git

PROFESSIONAL EXPERIENCE

DATA ENGINEER — ACT ON GROUP

Paris • 2024 – Present

Total Energies

- Maintained and optimized PySpark pipelines running on Databricks
- Processed HR datasets from AWS S3 sources for Power BI reporting
- Improved pipeline reliability and transformation performance
- Implemented automated data quality validation and anomaly controls

Ministry of Finance (CISIRH)

- Designed HR data marts for payroll and decision-support reporting
- Built Airflow DAGs orchestrating payroll processing pipelines
- Processed large-scale payroll and reference datasets within a Medallion-style architecture
- Implemented monitoring, logging, scheduling, and email alerting systems
- Developed data quality controls including uniqueness checks, delta analysis, and format validation
- Built dashboards to monitor rejected records and data anomalies

Internal Projects

- Developed SFTP ingestion pipelines for multi-client integrations
- Automated external data retrieval workflows using Python and Linux
- Built monitoring pipelines for Qlik Sense vulnerability tracking
- Implemented automated SMTP alerting systems

DATA ENGINEER — DR. BRANDT

Paris • 2021 – 2024

E-commerce BI Platform

- Built ETL pipelines integrating Shopify, Google Analytics, Google Ads, SemRush, and Klaviyo
- Centralized multi-source business data into MongoDB
- Delivered Tableau dashboards for business and marketing teams
- Identified SEO and UX performance issues contributing to website redesign initiatives

NLP SEO Tool

- Developed keyword clustering pipelines using RoBERTa embeddings and K-Means
- Built internal Streamlit applications for SEO analysis workflows

Sales Data Platform

- Automated ingestion pipelines from APIs and email attachments
- Stored and processed raw sales data in AWS S3
- Unified US and EU reporting datasets for business analysis

Grey Market Detection System

- Developed distributed scraping infrastructure using Scrapy, Selenium, EC2, and rotating proxies
- Built product matching pipelines using embeddings and classification models
- Identified unauthorized resellers and distribution leakage patterns

PERSONAL PROJECTS

FINANCIAL DATA PIPELINE

- Built end-to-end ingestion pipeline using SEC APIs
- Designed layered architecture from raw to analytics-ready datasets
- Integrated portfolio tracking APIs and financial analytics workflows

E-COMMERCE REVIEW ANALYSIS

- Scraped Sephora product reviews and Q&A datasets
- Applied NLP preprocessing and recommendation techniques
- Built Streamlit-based recommendation interface

EDUCATION

MASTER'S DEGREE — STATISTICS FOR EVALUATION AND FORECASTING

Université de Reims Champagne-Ardenne

BACHELOR'S DEGREE — ECONOMICS & MANAGEMENT

Université Paris 13

CERTIFICATIONS

- SAS Base Certification

LANGUAGES

- French — Professional
- English — Professional
- Tamil — Native
