

CV Jathurshan Gnanaseelan Benedict

JATHURSHAN GNANASEELAN BENEDICT

Data Engineer

Paris, France · g.jathurshan@gmail.com · LinkedIn · GitHub

PROFILE

Data Engineer with 3+ years of experience designing, building, and maintaining data pipelines across consulting, startup, and public sector environments. Strong experience with Python, SQL, PySpark, Airflow, Databricks, AWS S3, data quality, orchestration, and layered data architectures such as RDL, BDL, DWH, and DTM.

Able to work across the full data lifecycle: ingestion, transformation, modeling, monitoring, reporting, and business-facing delivery.

TECHNICAL SKILLS

Languages: Python, SQL

Data Engineering: ETL/ELT, Data Pipelines, Data Modeling, Data Quality, Batch Processing

Processing: Pandas, PySpark, Apache Airflow

Cloud & Storage: AWS S3, MongoDB, MySQL

Architecture: RDL, BDL, DWH, DTM, STG, Lakehouse

BI & Analytics: Power BI, Tableau, DigDash, Streamlit

Ingestion: REST APIs, SFTP, Web Scraping, Scrapy, Selenium

Tools: Linux, Git, Cron, SMTP

PROFESSIONAL EXPERIENCE

Data Engineer — Act On Group

Paris · 2024 – Present

Total Energies

- Maintained and optimized PySpark pipelines on Databricks using AWS S3 data sources.
- Processed HR datasets to feed Power BI reporting and business dashboards.
- Improved reliability of transformations and reporting pipelines.
- Implemented data quality checks including format validation, consistency controls, and null handling.

Ministry of Finance — CISIRH

- Designed and built HR data marts for payroll and decision-support reporting.
- Processed high-volume payroll and reference datasets within RDL → BDL → DTM architecture.
- Developed Airflow DAGs to orchestrate payroll workflows with scheduling, dependencies, and BashOperator tasks.
- Implemented monitoring, logging, and automated email alerting.
- Built data quality controls including uniqueness checks, delta analysis, format validation, and anomaly detection.
- Created dashboards to monitor rejected records and data anomalies.

Internal Data Projects

- Developed SFTP ingestion pipelines for multi-client data integration.
- Automated data retrieval from external servers using Python and Linux.
- Built monitoring pipelines for Qlik Sense vulnerability tracking.
- Implemented automated SMTP alerting systems.

Data Engineer — Dr. Brandt

Paris · 2021 – 2024

E-commerce BI Platform

- Built ETL pipelines integrating Shopify, Google Analytics, Google Ads, SemRush, and Klaviyo.
- Centralized multi-source business data into MongoDB.
- Delivered Tableau dashboards for marketing, e-commerce, and business teams.
- Identified SEO and UX performance issues contributing to website redesign initiatives.

NLP SEO Tool

- Developed keyword clustering pipelines using RoBERTa embeddings and K-Means.
- Built Streamlit applications to support SEO analysis workflows.
- Provided marketing teams with automated keyword grouping and content analysis tools.

Sales Data Platform

- Automated ingestion from APIs and email attachments.
- Stored raw sales data in AWS S3 and processed it with Python and Pandas.
- Unified US and EU sales datasets for business reporting.
- Helped identify regional performance gaps and commercial underperformance.

Grey Market Detection System

- Developed scraping pipelines using Scrapy, Selenium, EC2, and rotating proxies.
- Built product matching workflows using embeddings and classification models.
- Identified unauthorized resellers and distribution leakage patterns.
- Delivered monitoring outputs to support commercial and legal actions.

PERSONAL PROJECTS

Financial Data Pipeline

- Built an end-to-end pipeline ingesting SEC financial data into AWS S3.
- Designed layered architecture from raw data to analytics-ready datasets.
- Integrated portfolio tracking via external APIs.
- Generated financial indicators for investment analysis.

E-commerce Review Analysis

- Scraped Sephora product reviews and Q&A datasets.
 - Processed text data using NLP preprocessing techniques.
 - Built a Streamlit recommendation interface.
-

EDUCATION

Master's Degree — Statistics for Evaluation and Forecasting

Université de Reims Champagne-Ardenne

Bachelor's Degree — Economics & Management

Université Paris 13
